

BATHING CUSHIONS

Designed to make bathing a pleasure

Kingkraft
KINGKRAFT

The Kingkraft range of cushions provide additional protection and comfort when bathing and in the case of vacuum support cushions, can enable the position of the bather to be controlled ensuring safety at all times.

VACUUM SUPPORT CUSHIONS

The bean filling of the vacuum support cushions can be moulded to the correct shape by extracting air from the cushion using the attached hand pump. Once the correct shape, firmness and degree of support have been achieved, the pump can be locked in order to retain the shape. Alternatively, the cushion can be easily remoulded to alter the support for either the same or a different bather.

STANDARD CUSHION RANGE

Kingkraft bathing cushions are the easy way to make hard, slippery surfaces safe, soft and comfortable; allowing individuals to enjoy bathing without worrying about injury.

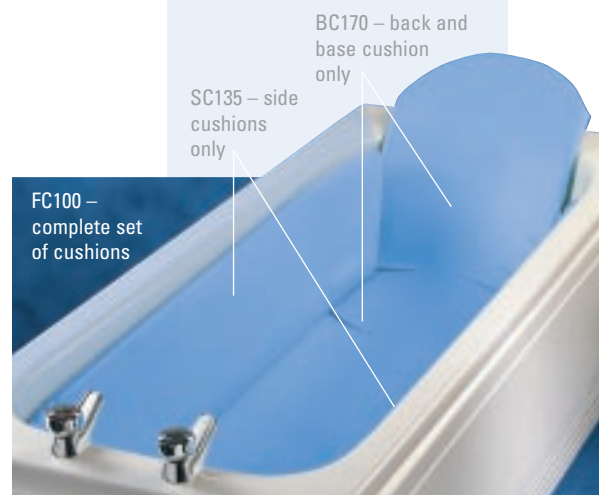

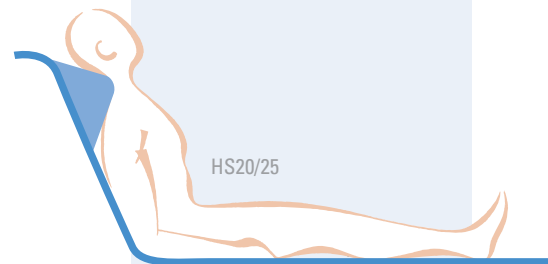

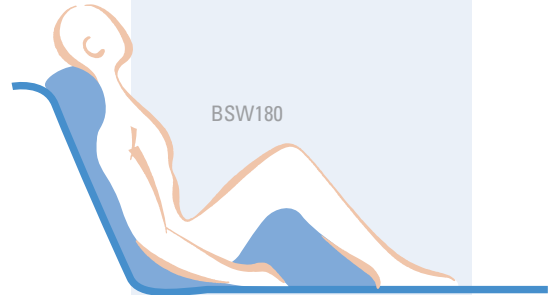

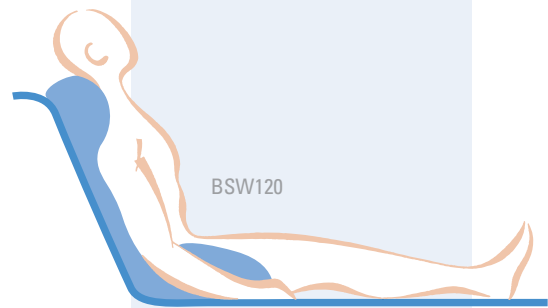

The Kingkraft bathing cushions are available as a full set to fit most conventional baths. In addition cushions for bath seats are available as well as individual square pieces to apply in various positions.

All Kingkraft cushions are fitted with rows of suckers to allow quick and easy application and removal.*

Cushions can be custom manufactured to specific designs and are suitable for use with all types of bath.

**PLEASE NOTE: The cushions are designed to be removable. In all cases care is needed to ensure adequate adhesion to the bath surface.*

Bath and chair featured are for illustration purposes only.
