- P12. About Theraposture and easy steps to independence  
Theraposture will support and guide you every step-of-the-way so purchasing a Rotoflex bed is stress-free

“ My Theraposture Rotoflex bed has been so fantastic, it has changed my life. I can move from a seated to lying position with the aid of the rotating and profiling action of my bed which is superb – I could not live independently at home without it.

**Ernie Burton, East London, Rotoflex owner**

”

“ As an OT with nearly 30 years of experience I can confidently say that the Rotoflex range of beds from Theraposture is my recommendation for those requiring a turning bed system. Theraposture is an ethical and specialist company with Trusted Assessors that will only ever recommend appropriate equipment following an assessment of need. I always review all the assistive beds on the market to meet my clients needs, however Theraposture is often the best choice to ensure my clients benefit from increased independence, well-being and peace of mind.

**Kate Sheehan, Occupational Therapist**

”

# The Rotoflex® concept –

An electrically operated adjustable bed that also provides powered rotational assistance to get you in and out independently

The Rotoflex from Theraposture is the original and proven rotating bed system. Uniquely, this sophisticated and proven adjustable bed has been developed over a period of 20 years. It allows people living with restricted mobility to access a bed independently and safely without the assistance of a carer.

Getting legs into bed is a problem for many people – the Rotoflex offers the solution. At the touch of one button, the Rotoflex will move you from an upright seated to a lying position and vice versa. The precision German mechanisms are smooth, quiet and strong so the transfer experience is pleasant and relaxing, you are always in total control.

The Rotoflex helps individuals with neurological conditions such as Parkinson's and MS

Theraposture offers the widest choice in rotating beds so that a variety of individual needs can be met. As either a single bed or part of a double bed (dual combination), every Rotoflex is available in a variety of surrounds that will aesthetically suit your home.

foot ends of the mattress and offers variable height for easier standing transfers – this also aids carers by raising the bed to a safe working height.

The Rotoflex can be set up to rotate to a specific side so that it can be compatible with a variety of room situations. In addition to the powered rotation, the Rotoflex can also independently lift the head and

The Theraposture Rotoflex truly delivers independence as it is a real alternative to carer assistance or hoisting. In this situation the bed can pay for itself many times over as the cost of care at home or in a residential setting is so high – see page 11.

The Rotoflex is extremely stable and will not tip over when rotated, thanks to its unique and safe design

# Rotoflex<sup>®</sup> Chair Bed EF

A clever and cost effective Rotoflex that can be used as a chair and a bed

The Rotoflex Chair Bed is the ideal combined solution for people who often sleep in a chair. It includes adjustment (profiling) of the head and foot

end of the mattress and powered rotation to turn you comfortably, but does not include variable height.

The Rotoflex Chair Bed EF is available with a variety of surrounds so effortlessly blends into a sitting room or bedroom setting. It is supplied with a headboard, foam mattress and two sets of fitted sheets.

Powered rotation and profiling

# Rotocare 175 & Rotocare Low 175

A manual turning bed system with powered profiling and variable height – suitable for users who live with a carer

The Rotocare 175 is an electrically operated, height adjustable and profiling bed with an additional manually controlled rotation that allows a carer to mobilise the user and to get them out of their bed.

The Rotocare is essentially a Rotoflex but without the powered rotation. It is suitable where the user may have permanent assistance and could be considered as a labour saving manual handling device that also provides independence and dignity to the user.

The Rotocare 175 Low provides low access ideal for smaller users or individuals with shorter legs and turns to both sides as standard.

SEAT DEPTH: 46CM  
MATTRESS HEIGHT: 51.5CM  
MATTRESS HEIGHT (LOW): 43.5CM  
BED WIDTH: 3' (90CM)  
MATTRESS LENGTH: 210CM

Manual rotation plus powered profiling and height adjustment

# Rotoflex<sup>®</sup> 175 Low

The lowest powered rotational bed in the range – ideal for smaller users and those requiring a lower seat height

The Rotoflex 175 Low bed provides the ultimate assistive solution for smaller clients so they can move from a recumbent to a seated position independently.

At its lowest position, this Rotoflex provides a distance of only 43.5cm between the floor and mattress surface. This allows users with shorter legs to sit more comfortably by getting their bottom to the back of the seat.

SEAT DEPTH: 46CM  
MATTRESS HEIGHT: 43.5CM  
BED WIDTH: 3' (90CM)  
MATTRESS LENGTH: 210CM

As with all Theraposture beds, the Rotoflex 175 Low is available with a range of mattress options.

- The lowest powered rotational bed in the range
- Fully meets BSEN60601-2-52 regarding safe working heights and entrapment risks
- 50cm lift motors to compensate for low starting height
- Powered profiling, rotation and variable height
- Ergonomic and simple-to-operate

Powered rotation, profiling and height adjustment

# Rotoflex<sup>®</sup> 200 –

for one person or part of a Double Combination

Every Rotoflex comes with a 14-day Suitability Guarantee – see page 12

The Rotoflex 200 is the ideal solution for the majority of people looking for an adjustable bed with powered rotation to help them get in and out of bed safely and on their own terms. Its seamless and sequential profiling and variable height movement is smooth and quiet. The rotation is activated by just pressing and holding one button. The hand control is simple to use and responsive so users always feel reassured.

It is available as a single bed, or part of a double combination, with standard beech veneer, solid oak or upholstered surround. There are four different widths of mattress/sleeping platform to choose from –

- 90cm x 210cm
  - 100cm x 210cm
  - 110cm x 210cm
  - 120cm x 210cm
- (Beds can be made longer or shorter)

The Rotoflex 200 is supplied with a memory foam mattress that moves naturally with the bed as various positions are selected. Other specialist mattress are available – see page 9.

Ergonomic, easy to use hand control

**Real Oak Finishes**  
 1. Natural Oiled  
 2. Natural Lacquered  
 3. Smoked 4. Milan  
 5. Lime 6. Olive

# The original Rotoflex 200 for one person, available in four different widths, or as part of a double combination for couples to share

When deciding which Rotoflex is the most suitable for you, one of our qualified Trusted Assessors will guide you through a product assessment. During this professional process you can actually try the Rotoflex bed and therefore be sure that it will meet all of your needs and expectations.\* If you require a double combination, your partner can also then decide whether to have any profiling or variable height functionality on their side of the bed.

Following purchase, peace of mind is assured through Theraposture's 14-day Suitability Guarantee which provides time to assess suitability without the worry of being left with a bed that isn't suitable for you.

- Electrically operated functionality to profile, rotate and raise the mattress platform
- Quality, precision German mechanisms for unsurpassed reliability and performance
- Maximise safety and reduce stress and strain when standing up and sitting down
- Ergonomic design with simple controls
- Choice of functions for a partner's half of the bed
- Bespoke designs with a variety of aesthetically pleasing finishes
- Fitted sheets and side rails/handles supplied as standard
- 20 years of development
- Range of pressure relieving mattresses

SEAT DEPTH: 46CM  
 PLATFORM HEIGHT: 39CM  
 MATTRESS HEIGHT: 51.5CM

# Heavy Duty Rotoflex® Beds

Rotoflex 250 – for users weighing up to 200kg

Rotoflex 300 – for users weighing up to 250kg

Theraposture offers two bariatric Rotoflex beds to assist larger users. The Rotoflex 250 has a safe working load (SWL)\* of 250kg and is a heavy duty version of the Rotoflex 200 bed. With its additional strength and power it can comfortably accommodate a person weighing up to 200kg (31 stones).

For heavier users Theraposture also provides the Rotoflex 300 which is the strongest rotating bed available today. This superb solution with super-strong German engineering can easily profile, lift and rotate a user weighing up to 250kg (39 stones).

Users of all shapes and sizes can live at home with the ability to get in and out of bed independently without the need to relocate or incur expensive carer costs.

**This means manual handling risks and costs can be massively reduced.**

## Both the Rotoflex 250 and 300 offer:

- Strong, safe and smooth powered profiling, rotation and variable height
- A variety of bed sizes
- Full compliance with British Standard BSEN60601-2-52 regarding safe working heights and entrapment risks

Both of these high quality, durable rotational beds are supplied with a memory foam mattress that is 4cm thicker than the standard product. The seat depth is deeper; there is an extra motor in the foot section to support heavy legs and these motors are supported by a gas strut.

The Rotoflex 250 and 300 can be supplied either with a wooden beech veneer surround or with an upholstered enclosure so their design will match your decor at home. For additional safety, both of these Rotoflex beds come with adjustable side rails and a battery backup system.

## Available sizes:

- 100 x 220cm • 110 x 220cm
- 120 x 220cm

(Beds can be made longer or shorter)

- Bespoke designs with a variety of aesthetically pleasing finishes
- Two sets of fitted sheets that remain in position during powered profiling

Powered rotation, profiling and height adjustment

SEAT DEPTH (250): 51 CM  
SEAT DEPTH (300): 55 CM  
PLATFORM HEIGHT: 41 CM  
MATTRESS HEIGHT: 55 CM

\* SWL includes the user, mattress and sleeping platform

# Mattresses

Theraposture offers a wide selection of specialist mattresses for the Rotoflex Bed range. These are available when you purchase a new bed or can be upgraded retrospectively should your needs change

## Triple layer memory foam

A quality memory foam mattress is supplied as standard with every Rotoflex apart from the Rotoflex Chair Bed EF which comes with a foam mattress. The memory foam mattress perfectly profiles with the movement of the Rotoflex thanks to the patented unique fixing design.

Offering a low-to-medium degree of pressure redistribution, this mattress is suitable for people at a low-to-medium risk of developing a pressure sore. The cover is made from waterproof material and has a multi-directional stretch.

## Repose

Theraposture offers a mattress using the proven Repose pressure relieving topper. This mattress has three layers consisting of two foam sections covered with an inflatable Repose mattress. It is suitable for users who require a medium level of pressure management. Theraposture offer a no cost option if supplied with a new or used Rotoflex.

## RO-HO dry flotation

This neoprene mattress is a zoned, advanced pressure-relieving surface that is ideal for users requiring high levels of protection against pressure related issues – up to grade 4 (very high risk). Each zone contains air cells that will adjust to meet the specific shape and size of a user's body. With optimum pressure distribution across the whole mattress, tissue viability and circulation can be improved.

## Rotoflex alternating air

For those requiring a very high level of pressure redistribution, the Rotoflex is also available with an dynamic air cell mattress. This mattress has been specially designed to be operational even when it is being rotated by the Rotoflex and is an alternative to the RO-HO system.

This specialist air mattress is not an option with the Rotoflex Chair Bed EF.

# Standard features, optional additions and accessories

Rotoflex features and accessories maximise comfort, safety and accessibility

## Standard features

Each Rotoflex bed from Theraposture is specified to suit you and your needs. Every bed includes a range of design features that have been carefully considered to ensure you can get in and out safely, readjust your position easily at night and feel safe when sleeping.

**A new Theraposture Rotoflex is supplied with –**

- High quality memory foam mattress (standard foam in the Rotoflex Chair Bed EF)
- Two side rail/handles
- Two sets of fitted sheets with a sewn in pillow case
- A battery backup that allows the bed to continue operating in the event of a mains power failure
- A 3-year parts with one year labour warranty for new beds. A 12-month parts and labour warranty for used beds – see page 11
- Option to extend warranties up to 5 years for new beds and up to 3 years for refurbished beds (conditional on service schedule) – see page 11
- 14 day suitability guarantee

Memory foam mattress

Sewn-in pillowcase

## Side rail/handle

Each Rotoflex bed comes complete with two side rails/handles which rotate with the bed. These can be lifted to a vertical position to help with side transfers or can be completely removed with ease.

Additionally, there are further options such as our multi-positional grab handle which is fitted to the head section of the bed. This option will mean that the side rail/handle will need to be altered in shape to assure that there are no entrapment risks.

Side rail/handle (standard)

Grab handle (optional)

## Optional accessories

Theraposture provides a range of quality accessories that can be fitted to any Rotoflex so that access and personalised comfort is assured. A Theraposture Trusted Assessor will explain and recommend additional features during a home assessment.

## Handle bar grips

These adaptable bars can be fitted to side rails so that users can adjust their sleeping position more easily through use of this additional leverage point.

They are manufactured in strong steel with an easy-grip handle and can be quickly removed or repositioned if needs changes. They also fold out of the way for sleeping.

This accessory is fitted as standard on each side of the wider Rotoflex beds (110 and 120cm) so that users can easily hold the side rail/handle.

## Lifting pole

Repositioning in bed can be very difficult for some users. A lifting pole can be used to offer increased leverage by pulling against the overhead adjustable handle.

## Castor/feet options

Castors are available in three different sizes. They each have individual brakes and can in most cases be added retrospectively if needed. The addition of castors will allow you to easily move your Rotoflex bed. Hoist and stand aid access is achieved using larger castors. Alternatively, your bed can be supplied with height adjustable feet.

### Prefer to rent a Rotoflex?

We offer a low cost monthly rental scheme with an affordable initial payment. You also have the option to return the bed at any time, penalty free. The Theraposture Rotoflex Rental scheme offers:

- FREE home assessment and demonstration by experienced Trusted Assessors\*
- FREE delivery and installation by Theraposture technicians
- FREE removal / relocation of old bed and storage for up to 14 days
- Two weeks to decide whether the bed is right for you with our 14-day Suitability Guarantee
- FREE annual servicing included
- All warranty costs (parts and labour) included
- Exchange for a new bed after 40 months or reduced rent
- Purchase option available

\* access permitting

### Refurbished beds

Fully refurbished Rotoflex beds are sometimes available. Each Rotoflex can be supplied with a comprehensive warranty for peace of mind. Contact Theraposture to discuss your budget in more detail and to see what is available.

### Buy-back scheme

If a Rotoflex is no longer suitable for individual care needs, Theraposture offers the option to buy back your bed at a guaranteed price. Further details are available on request and some conditions apply.

### Comprehensive warranty and service options for new beds

#### Bronze: free standard warranty

- 1 year parts and labour
- Additional 2 years parts only

#### Silver: 3 years full parts and labour warranty with annual servicing

- 3 years parts and labour
- Includes annual services at 12 and 24 months

#### Gold: 5 years full parts and labour warranty with annual servicing

- 5 years parts and labour
- Includes annual services at 12, 24, 36 and 48 months

Typically saving you up to £27,500 a year in care costs\*\*

The Rotoflex can reduce carer assistance with bed transfers from two carers to one, and in some cases can eliminate carer assistance altogether delivering true independence. This proven solution can allow you to safely get in and out of bed on your own terms without the cost of carers. With a Rotoflex there is no need to move into expensive residential care so you can remain in your home for longer.

Where two private home carers are replaced, the bed could pay for itself typically in just 14 weeks!

\*\* Based on average cost of 2 carers visiting twice a day
