

At BaKare we pride ourselves on ensuring that the paediatric range of products we offer meet the child's requirements. We work in collaboration with therapists, parents and carers to ensure that the correct choices are made. One of the key benefits of choosing a BaKare cot is that it is tailored exactly to the child's individual and unique needs.

We use Savi, a specialist manufacturer from Germany to hand craft these beautiful, natural wood care cots. All of the cots have been designed with a focus on comfort and safety, this is for the benefit of the child but also gives peace of mind to the carer.

## Ranges

### Tom

The combination of the beech wood design and Perspex sides ensure that high visibility into and out of the Tom cot is maximised. Due to the low entry height into the cot, it is possible to promote mobility into and out of the Tom cot.

- Electric height adjustment with profiling (raise legs and sit-up)
- Fantastic height adjustment range (34 – 104cm)
- Four winged doors for quick easy access with patented child proof lock
- Available in various sizes to cater for most room sizes
- Individual locking castors (wheels)
- Any combination of sticks or perspex can be ordered
- Electronic handset control with handset lockout as standard
- Fixed and removable padding available including Vinyl windows

### Knut

The Knut cot is a fantastic choice for all-round therapy and rehabilitation. Thanks to the four-winged folding sliding door, the barred sides and the flexible height and inclination adjustment possibilities, this bed provides excellent therapeutic support.

- Electric height adjustment with profiling (raise legs and sit-up)
- Four winged doors for quick easy access with patented child proof locks
- Individual locking castors
- Available in various sizes to cater for most room sizes
- Electronic handset control with handset lockout as standard
- Any combination of sticks or Perspex can be ordered
- Fixed and removable padding available including Vinyl windows

### Jonas

The Jonas cot offers a high degree of safety by the high barred sides and patented child proof locking system. This bed provides security for the user and peace of mind for the parent or carer.

- 4 Winged doors for quick and easy access with patented child proof lock
- Fixed bed platform with electric profiling adjustment for maximum comfort
- User weights of up to 150kg possible
- Comprehensive range of accessories available
- Available in various sizes (up to 180 x 220cm)
- Easy hoist access (model without drawers)
- Any combination of sticks or Perspex can be ordered
- Fixed and removable padding available including Vinyl windows

**There are a total of 8 cots within our range, each cot is built to order which enables us to ensure every cot meets the end users specific requirements. Over the years we have listened to the requirements of many Occupational Therapists & families, which has enabled us to bring many unique solutions to our customers.**
