

#hugbike

HUGBIKE® is an innovative tandem bicycle which, thanks to its long handlebars, will give you a complete and easy control from the back seat. Through this handy posture the passenger on the front will be literally “hugged” from the one sitting on the back!

#bike2hug

HUGBIKE® offers you a pleasant ride in complete safety, giving you the fulfilling sensation of a relaxed chat with your front passenger.

#eHUGBIKE

HUGBIKE® has realized a special EPAC model (= electric pedal assisted cycle) in order to allow everyone - without exception - to enjoy this unique tandem bike.

eHUGBIKE

Also: electric pedal assisted version!

OPERA
DELLA
MARCA

HUGBIKE® cares! Our bike is fully assembled by the social cooperative Opera della Marca, where a specialized team and persons with disabilities collaborate to create the bicycle. In this way we promote the social inclusion of people with less opportunities in a safe and supervised working environment.
